Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

Disclosed is a device for quantitative analysis of biological materials. The device includes an analyzing unit for photometric method and an analyzing unit for electrochemical method. The device has a socket for mounting a photometric test strip or a socket for mounting an electrochemical test strip or both sockets in a body. In addition, the test strip may have a recognition electrode, of which position on the test strip is determined by the analysis method and target materials in use. When equipped with a test strip carrying the recognition electrode, the device has a terminal for identifying the position of the recognition electrode.

International application No. PCT/KR03/01280

CLASSIFICATION OF SUBJECT MATTER

IPC7 G01N 33/487

According to International Patent Classification (IPC) or to both national classification and IPC

FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) G01N 33/487, G01N 27/26, G01N 33/50, G01N 21/78, G01N 33/558, A61B 5/00, C12M 1/40, C12M 1/34

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched Korea Patent and Applications for Inventions since 1975

Korea Utility Models and Applications for Utility Models since 1975

Japanese Utility Models and application for Utility Models since 1975

Electronic data base consulted during the intertnational search (name of data base and, where practicable, search terms used) eKIPASS, WPI, USPTO, PAJ, CAPLUS(STN), INSPECT"test strip, colorimetric, photometric, electrochemical, recognition electrode, analy*, quantitative, etc."

DOCUMENTS CONSIDERED TO BE RELEVANT
